Qian: Thanks. I'll wait.

In general, if any material is available for downloading online, just give me the web site.

For all graphs submitted, please put units on x,y-axes.

Re Fig. 3a,b,c - please make real graphs and include units on both axes.

We need a block diagram showing all hardware components involved in the process of Fig. 1. For example (see Fig. 1), show in block diagram which hardware components are involved in "Run Imaging Processing Pipeline to produce color phot", same for the block "Automatically detecting problems...", etc. No need for circuit schematics, just general hardware component block diagram to illustrate the entire process of Fig. 1.

Thanks.

Mike

Michael,

I found a few more articles and will fax to you. Also, here is the write-up with more details. I'll continue working on it some more.

Qian

Michael,

Here is what I have so far. I'll work more on it next week.

Qian

OK. In the meantime, if you have any additional disclosure material (e.g., sketches, drawings, text, artciels, etc.), please e-mail or fax the same so I have a chance to review it. Thanks.

Dear Qian: I have been assigned to prepare a patent application on your Photo Quality Meter invention. Please let me know when you are available this week to discuss the invention over the telephone. Thank you.

Best Regards,
